

ABUBACKER A K

Senior Software Engineer

Email: abuabdul86@hotmail.com | **Phone:** +44 74422 22935 | **Location:** Derby, UK

LinkedIn: linkedin.com/in/abubackersiddik | **GitHub:** github.com/abuabdul

PROFESSIONAL SUMMARY

Senior Software Engineer with 10+ years of experience building scalable enterprise applications and cloud-native systems. Specialized in full-stack development using Java/Spring Boot and Node.js, NestJS, Express backends, React/Next.js frontends, while architecting solutions on AWS. Expert in Infrastructure as Code (IaC), DevOps automation, and microservices architecture. Currently expanding into AI-driven development (**Generative AI, Agentic AI, OpenAI, LangChain, LangSmith, Flowise**) to build intelligent, cloud-optimized applications. Passionate about leveraging AI technologies with full-stack and cloud expertise to deliver innovative, scalable solutions.

CORE TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring Cloud, Spring AI, Spring MVC, Spring ORM, Spring Security, Node.js, Express.js, NestJS, Microservices, REST API, GraphQL

Frontend: JavaScript, TypeScript, React, Next.js, Redux, React Query, HTML5, CSS3, Tailwind, MUI

Cloud & DevOps: AWS, Terraform, Docker, Kubernetes, CI/CD (Github Actions, GitLab CI, Jenkins)

AI & Machine Learning: Generative AI, Agentic AI, OpenAI, LangChain, Flowise, GPT-4

Databases: PostgreSQL, MySQL, MongoDB, Redis, DynamoDB, Elasticsearch

Tools: Git, Agile/Scrum, Jira, Okta, Liquibase, SonarQube, Postman, TDD (JUnit, Jest, Mockito)

Additional: System Design, Kafka, Compliance (SOC 2, HIPAA, PII), Golang, Scala

PROFESSIONAL EXPERIENCE

Senior Software Engineer | CHEP | London, UK | March 2025 – Present

- Developing Java 17 microservices with Spring Boot and Spring Security for enterprise applications
- Integrated Liquibase across all environments within 2 months, including team training and onboarding
- Automated user profile management using Okta workflows, reducing manual effort by 40% within 2 sprints
- Leading OktaFGA-based access control implementation and microservices migration
- Supporting react migration from backbone and setup JSDefender obfuscation

- **Tech:** Java 17, Spring Boot, Microservices, AWS (Lambda, SQS, ECS, S3, RDS, DynamoDB), Okta, TypeScript, React, PostgreSQL, Terraform, Golang

Full Stack Engineer | Boston Consulting Group (BCG) | London, UK | Oct 2023 – Mar 2025

- Built transcript library system with APIs for data integration, onboarding 5 vendors within 3 months
- Developed AWS Lambda functions using Node.js for serverless data processing
- Migrated all deployments to Terraform, completing IaC transition in under 3 months
- Integrated GPT-4 and GenAI into document processing workflows
- **Tech:** Node.js, TypeScript, React, AWS (Lambda, SQS, S3, RDS), PostgreSQL, Terraform, Java, Spring Boot, GPT-4, GenAI, Golang

Senior Software Engineer | Canto | Birmingham, UK | Aug 2022 – Sep 2023

- Designed advanced search functionality for digital asset management across 10,000+ assets
- Integrated MerlinOne's NOMAD API to enhance video search capabilities
- Developed storage analytics reports, optimizing costs by 25%
- **Tech:** Spring Boot, AWS Lambda, Redis, React, DynamoDB, S3, CloudFront, RDS, OpenSearch, Jenkins

Software Developer | MarketAxess | London, UK | Aug 2021 – Aug 2022

- Designed backend services using Spring Boot with React frontend integration
- Developed OpenAPI-compliant REST APIs and AWS Lambda functions for data processing
- Achieved 95%+ SonarQube quality gate compliance through comprehensive testing
- **Tech:** Java, Spring Boot, Node.js, Redis, React, AWS (EC2, S3), Jenkins, Docker, SonarQube

Full Stack Engineer | Shaklee Corporation | Chicago, US | Jun 2020 – Jul 2021

- Developed backend systems using Spring Boot for e-commerce platform
- Built expert recommendation systems for personalized product suggestions
- **Tech:** Node.js, React, TypeScript, Java, Spring Boot, MySQL, AWS

Senior Architect | QBurst | London, UK | Nov 2017 – Jun 2020

- Led team of 8 engineers in designing and delivering enterprise applications
- Architected microservices solutions ensuring scalability and maintainability
- Oversaw CI/CD processes and DevOps practices

- **Tech:** Java, Spring Boot, MySQL, MongoDB, Redis, React, AWS (CloudFront, DynamoDB, EC2, S3, RDS), Microservices

Senior Software Engineer | Trafigura | London, UK | Jan 2015 – Nov 2017

- Developed backend for front office trading systems with TDD practices
- Implemented comprehensive testing using Mockito and TestNG
- **Tech:** Java, Spring Boot, Spring Security, RabbitMQ, MySQL, Scala

KEY ACHIEVEMENTS

- **AI-Enhanced Product Development:** Led Memoa product launch with AI-driven features, securing 100+ users and 10 paying customers within one week
- **Blockchain Innovation:** Designed Ethereum-based document management system with Solidity smart contracts at ConsenSys
- **Payment Systems:** Integrated Stripe for CineasCloud with multi-currency support, improving payment efficiency by 35%
- **Team Leadership:** Mentored team of 20 engineers, increasing productivity by 30% and improving delivery timelines
- **E-commerce Innovation:** Pioneered Shopify app development using Node.js and React
- **Cloud Architecture:** Designed cost-effective cloud solutions across AWS, DigitalOcean, and Linode platforms

CERTIFICATIONS & LEARNING

Recent Certifications:

- Learning Go – LinkedIn Learning (2024)
- AWS for Developers: DynamoDB – LinkedIn Learning (2023)
- React.js Essential Training, Hooks, Accessibility – LinkedIn Learning (2023)
- Scala 3 – LinkedIn Learning (2023)

Currently Pursuing: Advanced AI/ML courses focusing on LangChain, Agentic AI, and GenAI application development

PROFESSIONAL CONTRIBUTIONS

- **Technology Speaker:** Presented at Java User Group (JUG) meetups on emerging technologies
- **Open Source Contributor:** Active contributor to open-source projects
- **AI Innovation Focus:** Expanding expertise in Generative AI, Agentic AI, and LangChain to build next-generation intelligent applications
